SEFA BULAK

Software Engineer & Designer

sefabulak@icloud.com
+47 405 93 647

PROFILE

As a frontend engineer and designer specializing in modern web technologies, especially Vue (for web), React Native (for mobile), and GraphQL with headless computing, I deliver innovative, high-performing digital solutions. Designing and coding data sourced from GraphQL or REST APIs using Nuxt.js (Vue.js framework), with a keen consideration for user experience (UI/UX), remains one of the most gratifying pursuits in which I engage.

EDUCATION

University of the People, Computer Science (BCS) **2024 – 2026**

- Bachelor of Science in Computer Science; proficient in popular languages such as Java and Python
- Focusing on database management, AI, and machine learning; building a foundation for advanced studies

CERTIFICATIONS

Meta, Front-End Development **2024**

- Certificate issued October 2024

Northeastern University, UX Web Design **2024**

- Certificate issued October 2024

University of Michigan, Developing AR/VR/XR Apps **2024**

- Certificate issued October 2024

PROFESSIONAL EXPERIENCE

Front-end Developer | *UDY Digital (Hamburg, Germany)* **2023 – 2024**

- Developing software solutions for supermarkets and various startups using Nuxt.js and React Native
- Working with NestJS and MongoDB databases
- Ensuring integration with REST APIs and JWT; implementing third-party integrations such as App Store kits
- Designing and coding data-driven interfaces with a keen consideration for user experience (UI/UX)

Open Source Developer | *Self-employed on GitHub* **2021 – Present**

- Collaborating with individuals and organizations in the development of Vue.js projects
- Providing assistance across projects involving Vue.js, GraphQL, Node.js, and related topics

Front-end Web Developer | *Recepogullari Textile A.S* **2019 – 2023**

- Facilitating integrations between Nebim V3 ERP and various online marketplaces
- Designing and implementing the company website to meet specified requirements

Freelance Web Developer | *Self-employed* **2016 – 2019**

- Coding enterprise and B2B or B2C e-commerce platforms for businesses
- Crafting e-commerce plugins, such as virtual payment gateways, in PHP for the WordPress ecosystem

SKILLS

Vue.js
Nuxt.js
TypeScript
React Native
Apollo GraphQL
REST APIs and JWT
NestJS
MongoDB
Responsive Design
Server-side Rendering (SSR)
Java
Python
